Duke Centennial Hall, Room 345

International Environmental, Health, and Safety Management

Eric Wu, P.E.

Senior Consultant and Global Accounts Manager
Delta Consultants

Mr. Wu is currently employed as a senior consultant and global accounts manager at Delta Consultants to provide Environmental, Health & Safety services at global scale to the multinational corporations for their worldwide presence as well the emerging business operations, including following highlights:

- More than 20 years of technical consulting experiences for water & wastewater treatment system design, environmental risk & compliance management, as well as the engineering design & built turnkey contracting.
- Vast technical expertise with management capacity to lead the business development, team building, process improvement, and significant initiative.
- Highly global visionary of environmental management strategies for worldwide business platform and emerging markets.

Prior to Delta, he was employed at an ENR top ranking C&E engineering firm as the industrial water/wastewater practices leaders to serve the technical advisory to the company water/wastewater business line and provided the supports for the global/national/regional market development. Mr. Wu also had startup a one-man environmental consulting firm and developed the business from an initial single project into the satisfactory corporate major contract with long-term services. The result of strong performance of business operation and clientele was successfully acquired by a public trade major C&E engineering firm.

Mr. Wu is a UNCC alumna and graduated 1989 with MS Civil/Environmental engineering. He is registered PE in 4 states and is a committee member for Water Environment Federation (WEF) and North Carolina American Water Works Association (AWWA) as well as American Society of Safety Engineer (ASSE) local Chapter president (1999-2000). He also contributed his unique experiences to the US EPA rules & regulation development and more than 10 publications in the major water & wastewater journals.
